1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-11, and 20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Alberts. Alberts discloses the claimed subject matter including a hull and gunnel protector for use with a motor including a U shaped cover with an L shaped member having a planar base 14 and a planar side 16, and a hinged planar member 17 hingedly coupled perpendicularly to the other side of the planar base. Note that the member 17 is hinged coupled by bending (note column 3, lines 40-45), pads 9, 11, and a gunnel cavity formed in the middle of the U shape. Note also that the pads are of hard rubber (nylon reinforced similar to tires (column 2, lines 60-65), and they have a top pad at the top of the gunnel, and metal material 34.

3. Claims 2 and 12-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Keithley shows a cushion. Olivera shows a mount. Meier shows a protection system. Newsteder shows a bracket.
